General

The health of members and supporters is of primary concern to the Kingsway Little Athletics Centre. Accordingly, the Centre will actively seek to promote, encourage and support sun protection at Centre meetings, training and competitions.

As Centre competition is held in prime summer sports sun times, Kingsway Little Athletic Centre, where possible, will:

- provide a SPF50+ sunscreen for members and make it available for use to athletes and spectators;
- encourage members and supporters to wear a hat that complies with the Cancer Foundation of WA recommendations while participating in Centre activities;
- ensure maximum use of existing shade at the Centre. Where shade is not adequate, the Centre will endeavour to provide temporary shade structures.
- provide portable shade structures for members at competitions held away from Kingsway eg. Inter Centre competitions, Zone & State Championships;
- promote the Slip, Slop, Slap, Seek and Slide message in all Centre publications including posters, newsletters, brochures and handbook, as well as over the public address system at Centre competitions;
- encourage senior athletes, coaches, officials and members in prominent positions, and parents to be Sun Smart role models.
